### **DETAILED ACTION**

# Claim Objections

1. Claim 4 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 4 is dependent on claim 3, and claim 4 recites the same limitations as in claim 3. Therefore claim 4 does not further limit the subject matter of a previous claim.

## **Double Patenting**

2. Claims 1-4, 7 and 8 are rejected under the judicially created doctrine of double patenting over claim 1 of U. S. Patent No. 5,695,463 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: a device having a housing, needle, plunger, sleeve to cover the needle prior to injection and to retract into the housing during injection, wherein when the sleeve is pressed against the subject, the sleeve retracts.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

3. Claim 5 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 5,695,463 in view of Whitley, 5,399,170. Cherif-Cheikh '463 discloses the invention substantially as claimed, except for a releasable lock to inhibit the movement of the plunger into the housing. Whitley '170 however discloses such a releasable lock, see column 3, lines 6-17. It would have been obvious to provide a releasable lock as taught by Whitley on the Cherif-Cheikh '463 syringe, as it would be desirable to prevent movement of the plunger prior to use.

# Allowable Subject Matter

**4.** Claim 6 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sims, 4,846,809, Watts, 5,120,309, and Allison et al., 5,151,088, all disclose syringes with a retractable sleeve.
